Qualiméditerranée

Qualiméditerranée

created in 2006, reference cluster for viti-viniculture and the « agro-technologies » in the Mediterranean basin, positioned at the cross road of technologies for a Mediterranean agriculture and agro-food sectors.

Our ambition

to support local enterprises and research centers to sustain and strengthen their commercial, scientific and technological activities, focused on innovation.

Qualiméditerranée supports firms, SME's and start-ups created in business incubators and gives them the means (including web facilities, financial support advices) to develop in order to reach new markets.
